

Meadow Next mattress

The Meadow Next mattress is soft and extremely resilient. For this reason the cows will lie down comfortably for a long period of time, and the surface of the mattress will keep its even shape. The main part of the day cows are lying down to ruminate. While in the barn, dairy cows prefer a stall with a soft bedding. This results in longer hours of resting and therefore the cows will be in a good condition to produce more milk.

Soft and resilient

The Meadow mattress is composed out of a high quality latex foam, surrounded with PVC wrap and a rubber top mat. The total thickness of the mattress is 4 cm (for heifers 2.5 cm).

Durable top mat on a roll

The 4 mm thick top mat is made of rubber with a carcass of a strong ply of polyester-nylon. The mat is attached to the floor on all sides. This to prevent moisture and manure from creeping underneath the top mat, which is essential for the hygiene and durability of the latex foam layer. Moreover the top mat is exceedingly durable.

Secure grip for lying down and getting up

The non-skid top surface of the Meadow Next mattress provides the cows with sufficient grip for laying down and getting up.

Protection at the rear

The rear of the stall endures the most wear by way of cow traffic. The top mat is fastened at the rear with a solid rubber strip of 20 mm thick and 60 mm wide. This also gives the advantage that the mattress slopes down, so moisture will drain and the mattress is easy to clean.

Easy to mount

Mounting is simple. At the rear the mattress is attached to the floor with a flexible rubber strip and at the front and sides with aluminium or PVC mounting profiles. Special nails are used for secure mounting. After drilling a hole the nails can be hammered in the concrete without using a plug.

Longevity

The Meadow Next mattress is very durable, whilst retaining its comfort. With a warranty of 10 years on the top mat it is a solid investment (ask for warranty details).

Available for cows and heifers

The Meadow Next mattress is available in sizes for cows and heifers.

Cows

Thickness: 4 cm
Width: 185 cm
Top mat: rubber with nylon carcass 4 mm, width 200 cm
Mounting: Rubber strip 20 x 60 mm and aluminum profiles

Heifers

Thickness: 2.5 cm
Width: 130 cm
Top mat: rubber with nylon carcass 3 mm, width 150 cm
Mounting: Rubber strip 20 x 60 mm and PVC profiles

FriesKo waterbed

The ultimate comfort is provided by the FriesKo waterbed. A water layer between the animal and the floor allows for no contact points between the animal's body and the floor. Improving herd health by preventing joint injuries.

The waterbed is standard made with a length of 190 cm. The water compartment and the surrounding strong rubber area is made out of one piece. The entire waterbed is reinforced with two layers of synthetic fabric.

A special designed clamp seals the fill opening.

Important characteristics:

- No seams, therefore hygienic;
- Ultimate comfort;
- Easy to clean, does not absorb moisture;
- Available in several widths;
- Standard for a stall length of 1.90 meter;
- Guaranteed for 10 years (ask for warranty details);
- The waterbed is exceptionally flexible and resilient;
- Flexibility prevents dirt from sticking;
- The waterbed dries quickly;
- Cool in summer and warm in winter;
