

Full automatic brush Krazzmaxx

It is interesting to see how cows give themselves an extensive brush and massage.
The animals feel improved health due to this full automatic brush.

Lice, mite and other parasites will be removed off the skin.
Eczema and infestation from the skin through fungus will decrease or even disappear.

Through the large brush surface and through the massage the skin gets well blooded and the metabolism is enhanced.
The milk production increases as it improves the heat.

The use of the Krazzmaxx works out in quietness in the barn.

Major characteristics:

- Cleans thorough back, breast and flanks;
- Disposes of parasites and old hair;
- Takes care of the itch;
- Massages a large skin area;
- Enhances the metabolism;
- Less shaving;

Technical details:

- Electric motor : 230V/50Hz
- Brush rotation : 60 U/min
- Required free space : min. 110 cm wide
- Weight : 133 kg

11.15.300 Full automatic brush Krazzmaxx

Cow brush with spring

Cow brush with spring

- 11.15.200** The spring prevents the cow brush from being damaged for example when cows are jumping.
- 11.15.900** Separate brushes

The bull pen

The bull; large and strong. An animal that deserves to be treated with much respect. Spinder developed a bull pen specifically for breeding bulls, consisting of a robust safety feed front (two feed openings) and an equally robust door. The idea is that a cow can be safely and conveniently brought in and taken out of the pen, because the bull is secured in the feed front.

Since the fence has been constructed with an adjustable neck width, the bull pen can be used for almost any type of bull (in terms of age and size). The two feed openings can be operated independently from one another; simple and safe for fingers and hands.

A complete bull pen front is 3 m wide and, approx. 1.7 m high. It is made up of a heavy pipe (76 mm, among others) and heavy tubes (square 80, among others).

The bull pen consists of:

- Robust safety feed front (i.e. with lower opening) with adjustable neck width, 2 feed openings;
- A heavy door with a safety lock.

The operating modes of the feed front

- Opened position; bulls and cows can freely move their heads in and out of the feed front;
- Self-locking position where the animals lock themselves in when they start feeding;
- Individually releasing an animal by repositioning the operating sleeve;
- Individually releasing an animal from the safety opening (bottom opening) by repositioning the operating sleeve.

02.59.100	Safety feed front for (breeding) bull, 185cm
02.59.250	Door, with lock and locking points, 96cm
10.81.180	Floor-mounted support post \varnothing 80 mm x 180 cm
11.06.800	Stopper \varnothing 80 mm
